

2X One Step RT-PCR Mix

RP100150 rxns

Component	RP1001 (50 rxns, 50 µl/rxn)

1. Add 10 µl of template DNA to each reaction.

2. Add 10 µl of 2X One Step RT-PCR Mix to each reaction.

3.

4. Run the reactions in a thermal cycler.

5. Analyze the products by gel electrophoresis.
